

23 March 2020

To whom it may concern,

Due to the unprecedented outbreak of the COVID-19 virus worldwide, there have been a number of US states (including Michigan) which have issued “shelter in place”, “shutdown”, “stay at home”, and/or “business closure” warnings. This means that all residents are to remain at home while “essential businesses” are to remain open to provide critical services.

DCS is a diversified company which distributes and manufactures a wide variety of IT, Electrical, Mechanical and Electro-mechanical products in their US facilities and meets the definition of “essential businesses” which are to remain open to support the Country during this time of crisis.

DCS serves several industries with the products we distribute and manufacture that supports critical segments of the US infrastructure which must be maintained during these trying times;

- Military
- Aerospace
- IT Services
- Industrial Equipment
- Healthcare
- Local, State & Federal Agencies
- Logistics
- Technology

We continue to implement strict precautionary measures in all our facilities which meet or exceed government and public health requirements, to reduce risk for our team members who are performing their duties.

All DCS operations will continue to perform our obligation as an “essential business” to help support our partners and the US infrastructure in this extraordinary time.

If you have any questions, please contact your DCS associate or any member of the DCS team.

Brian Leek  
Division President
