## DCS Opens New Northeast US Distribution Facility

Ann Arbor, MI – August 18, 2020 – DCS announces that it will enhance service to the Northeast US region with the opening of their Walden, NY distribution facility. The enhancement will expand product availability, reduce shipping costs, and dramatically cut delivery times for this region of the country.

Beginning August 18, enhanced ground next-day regions include New York, New Jersey, Pennsylvania, Connecticut, Rhode Island, Massachusetts, Vermont, New Hampshire, Southern Maine, Delaware, and Maryland. Located in Walden, NY, this new distribution center will offer resellers access to a very broad range of imaging products under a single roof with same day will-call service to customers in the Walden, NY area.

“Improving service to our customers is always our top priority,” noted Diana Hollenshead, DCS’s Vice President of Operations. “The location of this new Distribution Center will allow us to do just that by reducing delivery time for our products to a very key part of the country. It will also allow us to secure a more cost-efficient logistics structure to handle the growth of our business.”

This latest announcement significantly increases DCS’s current supply chain footprint and is just another addition that further strengthens DCS’s nationwide distribution network.

DCS’s commitment to delivering the fastest, most reliable, and affordable delivery throughout the US is just another example of DCS’s continued effort to provide great value to our dealers and their businesses.

### About DCS

DCS ([www.dcsbiz.com](http://www.dcsbiz.com)) is a leading North American distributor and manufacturer of imaging supplies with offices in Michigan, Florida, Nevada, Kentucky, Texas, New York, and Quebec. DCS delivers the highest quality OEM and compatible brands and powerful MPS Program with the industry’s most competitive pricing. Our resellers can have confidence that their shipments will be delivered across the country...from the only distributor/manufacturer in the industry today. The growth at DCS over the past several years is attributed to a keen understanding of the needs of our dealers/resellers and the delivery of world-class solutions to fuel their business.
